

**TO:** CORD Members

**FROM:** Kellie Walsh, Assistant Planner, Office of Energy & Planning  
Susan Slack, Principal Planner, Office of Energy & Planning

**DATE:** March 26, 2015

**RE:** Staff Report – SLR Requests

- **SLR 15-002 CONCORD**

- Public comment period closes March 26
- **Rivers Management Advisory Committee (RMAC)** – not opposed; meets RMAC’s de minimis impact criteria so no need for review by full committee
  - RMAC asked the Upper Merrimack River Local Advisory Committee (UMRLAC) to provide comment. Its only concern is the precedent established (through recent legislation) to dispose of the state's interest in lands held in an easement purchased through the former Land Conservation Investment Program, and how that precedent might be applied towards a less desirable outcome with other properties.
    - Clarification provided to LAC – The property subject to this SLR is not the same property that was subject to disposal through 2014 legislation (HB 1145). Both this property and the HB 1145 property are held by the state in fee and not easement. Legislative action has occurred three times prior to HB 1145 to dispose of portions of LCIP property.
- **Lakes Management Advisory Committee** – not within LMAC jurisdiction
- **Division of Historical Resources** – no objection

- **SLR 15-003-A, 15-003-B, 15-003-C and 15-003-D – MEREDITH**

- Public comment period closes April 20, 2015
- **Division of Historical Resources** – does not object; the railroad corridor is potentially eligible for the National Register of Historic Places but the leases would have no potential to affect the property. Proposed changes to the property would require DHR consultation.

- **SLR 15-004 – SALEM**

- Public comment period closes April 20, 2015
- **Division of Historical Resources** – no historic properties affected
